

NEWS AND VIEWS . . .

And What Have You

By BOB CRAIG

For the benefit of those of you that have expressed your concern as to the welfare of "Earl" we feel that we should pass along the information that he is doing fine. At the time of this writing he still is not using his right front leg but otherwise seems to be in good shape.

And for the benefit of those of you that do not know Earl — and from the number of inquiries this cannot be too many of you, at least not many high school students — Earl is the unlikely name of our daughter's dog that was struck by a car just before school Friday morning.

Outside of our family Earl's only claim to fame would have to be his name since he is just a run-of-the-mill pup. (This admission will undoubtedly put me in good standing around our house for awhile.) This odd name has caused some problems because in relating the story about the accident around anyone not aware that Earl is a dog, you have to be careful and either not mention the name or else quickly add the information before your listener gets carried away with concern.

As with most families with pets and children you sometimes have a hard time telling one from the other as far as which is the most important or who gets treated the best. In fact while Earl is convalescing from his injuries he seems to be getting more attention than our oldest son did early this summer following his appendectomy. This, we suppose, is because pets do not talk and you sometimes have a hard time knowing just how they are getting along.

. . . and as to why our daughter has a pup named Earl — we won't even try to explain.

Friday night is the night that all of you Piper fans have been waiting for and we hope that a goodly number of you find your way over to Rotan for the first contest, and we hope conquest, of the '67 Piper Eleven. The boys have come through their two scrimmages in good shape and showed themselves to be ready for the season to get underway. The boys have a good schedule this year without any games to be played very far from home and we hope that all you can make it to all of them.

Tom O'Connor, editor of the Alledale (S. C.) County Citizen strikes a note of discord in an editorial on who is to blame for the riots in our cities when he says that the American press, and that phrase includes all news media, must face up to the fact that it is just about as guilty as any.

He accuses news editors of television, magazines, newspapers and radio of shirking a clear responsibility, when they lend credence to charges and counter charges voiced by so-called leaders, without seeking to authenticate the accusations.

He accuses news reporters of being guilty of "making names for themselves" by deliberately building up, through unwise publicity, minor incidents and minor personalities.

He accuses the news media of irresponsibility for giving wide publicity to matters, such as meetings and propaganda for extremist groups, and the mouthings of rabid rabble rousers in the interest only of sensationalism.

He goes on to charge that no Carmichael, no Brown, no King, no Powell has yet proved worthy of the publicity handed out hour by hour by the news media. And charges that the American press has put itself on a diet of blood, guts and disaster in preference to decency, respect for the intelligence of its audience and concern for the general welfare.

And we find that to a large extent we must agree with him. We have felt that too often the news media in an effort to get the readers attention has misled him.

It is our contention that the press of America has a much bigger duty than just manufacturing headlines and needs to concern itself with more responsible leadership.

Pipers, 'Hammers' In Opener Friday

The Pied Pipers will open up their fall campaign Friday night by traveling to Rotan to meet the Yellowhammers with game time at 8 p.m. The Pipers will go into the game in good physical shape with the exception of two players that have missed most of the workouts this season, according to Joe Youngblood, head football coach.

Missing from the Piper lineup will be Jim Hastings who has a leg injury and David Wallace who is out with a broken leg.

Following scrimmages with Seagraves and Munday, Coach Youngblood said that he was very encouraged by the boys performance and his main concern was lack of depth. Because of this lack of depth there will be nine boys playing both offense and defense most of the time.

Probable starters for the Pipers will be Terry Holt at center, Raul Solis and Gil Lain at guards, Milton Davis and Mike Brown at tackles, and Earnest Ledbetter and John Holland at ends.

In the backfield will be Bob Clifton at quarterback, Donnie Smith at fullback, Philip

Simpson at tailback and Sammy Ferguson at halfback. Edgin Baldwin and Paul Long are also expected to see considerable action at halfback and quarterback, respectively.

On defense, Gary Smith and Jerry Braley will replace Clifton and Brown and with

Holt will be the linebackers. The Pipers will be led by three captains again this year in Davis, Simpson and Ferguson. Ferguson was elected the third captain by the team this past week.

The Yellowhammers are expected to throw a lot from their Pro-Type offense according to scouting reports here. They will be led by Larry Van Loon, 190-pound senior who is an all area performer back from last year, at fullback. Quarterbacking the Hammers will be David Hargrove, who has two tall ends to throw to in Jim Kelley, 6-6, and Ronnie Kincaid, 6-3.

The Hammers have four all district players back in Van Loon, Hargrove, halfback Augie Garcia and guard Larry Helm.

B TEAM AT ROBY

In other action, the Piper B team will take on the Class B Roby varsity at Roby Saturday night at 8 p.m. Roby has 11 lettermen back from last year and is expected to have a strong passing game going for them.

Tuesday night the seventh and eighth grade teams will travel to Merkel to open their season.

DPS Testing Headgear to Meet Standards for Motorcycle Riders

AUSTIN — The Director of the Texas Department of Public Safety, Colonel Homer Garrison, Jr., reported today that protective headgear standards for motorcycle operators and passengers have been established.

The DPS is currently testing headgear and issuing approval certificates to helmets meeting the prescribed standards. The Department was delegated the responsibility of establishing standards by the last Legislature. Enforcement of the law becomes the duty of all police agencies.

Effective January 1, 1968, all motorcycle operators and passengers will be required to wear approved protective headgear whenever riding a motorcycle. The law provides that any person convicted of riding a motorcycle without protective headgear may be fined not less than \$10 nor

more than \$50.

Garrison cautioned parents and youngsters against rushing out and buying one of the cheaper helmets appearing on the market at the present time until it is certain that the helmet will receive safety approval.

"These purchasers are looking for an opportunity to both comply with the law and to save money," Garrison said. "But many of these helmets may fail to meet the minimum standards and will not provide for the safety of the wearer. These will have to be discarded and new helmets purchased."

"The Department will have a list of approved helmets available about October 1. This list will be furnished to all police agencies, to headgear wholesalers and retailers, and to news agencies. The list will be updated as needed

to include any headgear which is granted approval.

Sgt. Jesse M. Mendoza of Fort Worth is currently stationed at Richmond, Va., for two weeks of summer camp training for army reservists. He is the son of Mr. and Mrs. Sipriano Mendoza Sr.

If a floating fishing line sinks below the surface of the water, it may just be dirty. Wipe it off with a soft cloth and then applying a light coating of commercial line dressing.

Outboard fuel tanks should run until dry, from time to time, and the bottom checked for dirt, rust and water. If any is found, flush the tank clean with a bit of kerosene or commercial alcohol to remove the water and sediment.

If a fishing line is twisted, this curl can be remedied simply by dragging the line in the water behind a boat. Water flowing over the line will take the twist out of it. Trail the line and nothing else — no swivel, no hook, no sinker — just the bare line.

Neinda Philosopher Takes Dim View of Scientists Wanting Farmers to Grow Square Tomatoes

Editor's note: The Neinda Philosopher, on his Johnson grass farm on Route One examines some new ideas in farming this week, more or less.

Dear editor:
I was in town yesterday buying another nickel tractor bolt for a quarter and a friend handed me a copy of Time magazine and said "Here, there's an article in this about farming you might like to see."

I'm not sure. According to it, vast progress is being made in agriculture these days, and almost undreamed-of new ideas are being studied.

For example, plant scientists are trying to develop a square tomato. That's right. They want a tomato that grows square instead of round, because, for one thing, it would fit better in a sandwich.

This is what I'm talking about. Why put all the burden

on the farmer? It seems to me it'd be a lot simpler to just make round bread and use the tomatoes we've already got.

It sure was lucky that table plates originally were designed round instead of square, or you know what kind of eggs scientists would be trying to get hens to lay.

For years agricultural experts have been telling me how to raise feed that's more palatable and nutritious for cows, whereas I'd like to see them working on the grass and weeds I've already got. Nearly every idea I hear from the experts puts more work on me than my cows.

Another part of this Time article reported that "an hour of farm labor now produces more than six times as much as it did in 1920."

I don't know what farm they studied, but it wasn't

this one.
However, I can see some advantages in these figures and hope they spread throughout the country, especially around here. If it took six hours in 1920 to produce what one hour produces now, a farmer working 12 hours then needs to work only 2 hours now to get in a full day. I'm in favor of that.

By the way, speaking of farming, I noticed that that well-known farmer, Chet Huntley, had to give up one of his farms because, he said, somebody was always opening the gates to his 300-acre spread and letting his 900 cows roam the countryside.

Nine hundred cows on 300 acres? That's not a ranch, that's a ghetto. Somebody opened the gates? Most likely they busted out. Those cows were just rioting, and I'm surprised he didn't have a deep-thoughted television

analysis of the underlying causes.
Yours faithfully,
J. A.
